- ❖ Steel Structure

However, we are committed to expand and enhance our services portfolio and come to the expectations and requirements of our clients.

As an independent company we believe in planned and consistent growth and building up an enviable reputation for quality of our services and excellent relationships with our customers and clients.

ABMCF MISSION

To continually strive to provide cost effective and high quality products that meet customer expectations and satisfaction.

ABM VISION

To provide the highest level of product performance, quality, service, and support attainable in the construction industry. Honesty, integrity, dependability, open communication and teamwork guide every aspect of our business to benefit our clients.

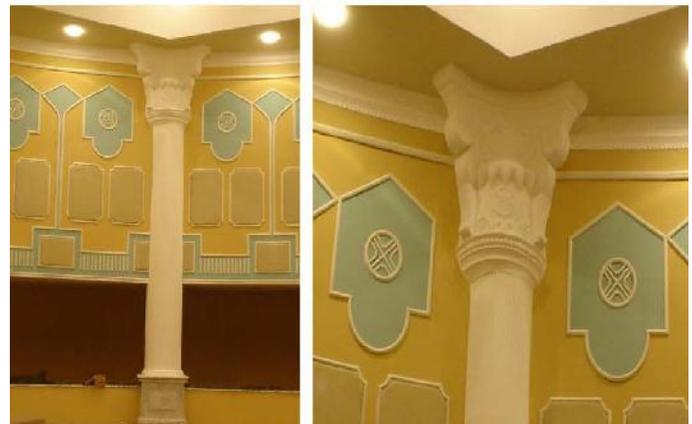

QUALITY OBJECTIVE

- ❖ **Our prime objective is to satisfy the needs and expectations of our customers by providing and supplying high quality services based on the utilization of modern technology principles and consistent application of our Quality Management System**
- ❖ **Establish, implement and maintain an efficient and effective quality system that achieves the quality objectives, meets contractual and project's requirements.**

Facility Management:
PAINTING

Our range of commercial and domestic painting and decorating services include;

- ❖ Interior and exterior painting
- ❖ Spray painting
- ❖ All Wall coverings
- ❖ Wooden floor preparation and re-sealing
- ❖ Minor repairs
- ❖ Renovations
- ❖ Pro-active project management
- ❖ Insulation paints (Epoxy)

Interior and exterior painting

Spray painting

A good paint roller is underestimated by many homeowners, but is in fact, the tool of choice for many professionals. About the only time spraying is preferable is when a large, rough-textured surface such as brick or stucco must be covered, as is often the case in painting commercial buildings. For most

houses, a roller will do just fine. Roller covers come in many varieties, with the “knap” thickness ranging from one-eighth of an inch to a full inch, depending on the surface to be painted. The thin-knap roller covers are designed for smooth surfaces, like doors and the plywood soffits found under the roof cornices of most houses. Thicker-knap roller covers work well for rough-textured siding, such as Masonries, cedar, and even some brick. Standard roller width is 9 inches, but specialty rollers 3 or 6 inches wide are also available for narrow areas a wide roller cannot reach

FLOORING, LINING & INSULATIONS

RENOVATIONS

WOODEN FLOORING

An attractive and modern kind of flooring that has the same surface appearance of solid wood, but greater structural stability. One advantage of this is that it is better able to deal with changes in

moisture and temperature. However, as with any floor, steps need to be taken to ensure it stays in good shape.

PLASTERING

We can provide Plaster boarding, Plastering, outside rendering and pebble dash, dry lining, bonding, rendering and hard walling, flood damage and insurance work for residential and commercial premises. We have full Liability Insurance cover.

Before

After

The first thing you need to do if you decide on plaster wall finishes is to purchase the proper materials and tools. You will notice there are different types of "mud" available for plastering. Many people make the mistake of purchasing a fast setting compound thinking they will save time, but this is a mistake. Mud that sets more quickly is also much more difficult to work with. On big jobs, you may not save any time at all using the fast setting types and you will definitely have more difficulty doing the plastering.

We can also do patch-work to re-skim and new build also large barn conversions. Once a job is completed we do offer a tiling service, if required. We offer to contact us for a free no obligation quotation, for a very reliable and friendly service.

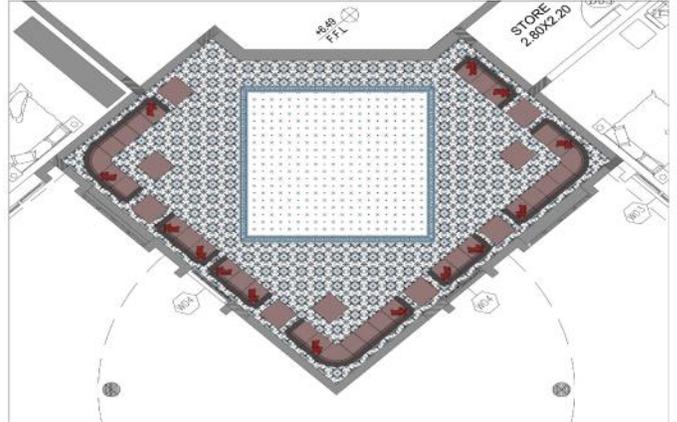

TILES INTALLATION SERVING

Whether you are an architect, designer, contractor or home owner, our expert craftsmanship and attention to detail will bring your project to life.

✚ For Houses, Villas & Palaces

- ❖ Arrange with the contractor to be sure about the design.
- ❖ Arrange the material with the contractor on the time.
- ❖ Arrange all the accessories.
- ❖ Check the work after tiling.

Using old style in modern restaurant

CONSTRUCTIONS

Erection of Precast Concrete Elements

Decorations: Gypsum works, drawings on wall, doors, gates, drabs, hand rails, etc.

- ❖ **COST EFFECTIVE**, Speed up construction, shipped on demand for immediate installation.
- ❖ **DURABLE**, long lasting construction with low life cycle costs.
- ❖ **MAINTENANCE FREE**, will not rot, rust or burn
- ❖

Construction of Housing and Villas

Getting started in the Certified Erectors program is easy—simply fill out the enclosed form and return it to PCI. Be sure to clearly include your address, phone number, etc., so that, once accepted, we can immediately list your firm as a Certified Erector in PCI publications and on our Web site.

Concrete can be poured into moulds to create many different shapes and forms, including slabs or panels for building walls or floors. These products are called precast concrete pieces. Quite often, a Hoisting Engineer/Crane Operator will lower pieces into place.

Job Related Skills, Interests and Values

- using hand and power tools and machines, such as pneumatics wrenches
- reading and interpreting architectural drawings, blueprints and diagrams
- preparing the worksite for installation, often including loading and unloading pieces
- aligning, bolting, welding or using other mounting devices to join panels together
- guiding the crane operator, using hand signals
- applying grout, preparing surfaces and finishing grouted areas
- using riggings and scaffoldings
- applying caulking, primers and producing various finishes on concrete
- observing safety in accordance with government and company standards

Employers who hire Precast Concrete Erectors include:

- Bricklaying contractors
- Manufacturers of Precast Concrete
- Construction companies
- Decorating Contractors
- Painting Contractors

You may also want to explore other careers that require similar interests and skills, such as:

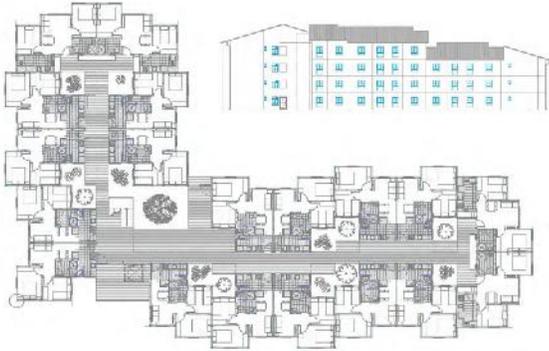

- Cement (Concrete) Finisher
- Cement Mason
- Bricklayer
- Stone Cutter
- Terrazzo, Tile and Marble Mason
- Reinforcing Rod worker
- Welder
